=====

1.1 - Black Jack

=====

HOW TO PLAY

BlackJack

Each player wins by having a higher point total than the dealer that is equal to, or as close to 21 without exceeding it. If he goes over 21 he has busted and loses his wager.

Cards

All face cards are valued at 10. An ace may be counted as either 1 or 11. All other cards are valued at the number on their face.

Procedure

Each player is dealt 2 cards face-up. The dealer receives one card face-up and one card face-down. If the dealer has a blackjack, the game is over, All wagers of those without a blackjack will be collected by the dealer. If the dealer does not have a blackjack and any player does, they are paid at 3-2 odds. Any remaining players continue to play the game. The player can ask the dealer to deal any number of cards as he attempts to come as close to 21 and not exceed it. Over 21 is a bust, and loses the wager. When all players' hands are completed, the dealer flips his hole card, either taking additional cards or standing. The dealer's hand is then compared to the player's hands. Any hand that is lower than the dealer's results in a loss of their wager. Higher hands are paid 1-1. A tie is a PUSH. If a PUSH occurs, the wager returns to the player.

Double Down

If the total of the hand dealt is 9, 10 or 11, the player may double down. He places a wager equal to the original and then receives only one additional card.

Split

If a player receives two identical cards, he may split. Each card is treated as if it were the first card dealt and an additional wager of the equal amount is placed on the new hands.

Insurance

When the dealer's face-up card is an ace, players may buy insurance. The cost is half the opening wager. The pay-off is 2-1 against the dealer's blackjack. The opening wager is lost, but insurance will recoup that.

My Tips and Hints

- Always hit if you have about 11 or less.
- Always stand if you have 17 or over.
- Insurance costs half your current bet so don't even pay for it.
- If you have a black jack you win +50% of your current bet.
- It's good to split.
- It's risky to double because you might get a low number card. But getting a 10, J, Q, K, or A are high.

=====

1.2 - Slots

=====

HOW TO PLAY

Place 1 or 5 bets (Look at the tips and hints a few lines below) then pull the lever. You'll will get money depending on the winning combos you get. If you see a winning combo on the screen diagonally and wondering why you did not get it, then it is because you did not bet a diagonal bet. This game is so simple, anyone can play. EVEN YOU!

Winning Combos

Cherry, Any, Any	= X2
Cherry, Cherry, Any	= X5
Lemon, Lemon, Bar	= X10
Lemon, Lemon, Lemon	= X10
Plum, Plum, Bar	= X14
Plum, Plum, Plum	= X14
Bell, Bell, Bar	= X18
Bell, Bell, Bell	= X18
Watermelon, Watermelon, Bar	= X100
Watermelon, Watermelon, Watermelon	= X100
Bar, Bar, Bar	= X100
Seven, Seven, Seven	= X200

My Tips and Hints

- Lets draw this slot machine to teach you about betting.

```
Diagonal bet  4\      /
Horizontal bet 2-BE SE CH-
Horizontal bet 1-BA LE LE-
Horizontal bet 3-SE BE PL-
Diagonal bet  5/      \
```

This is a completely losing screen. If you pressed A 5 times, you will win any winning combination in diagonal bet 4 and 5, and horizontal bet 1, 2, and 3. But since there're no winning combinations in this example. You lose everything.

- I always like to bet 5 times even though I lose more money that way.
- I hate this game.

=====

1.3 - Roulette

=====

HOW TO PLAY

A ball is dropped on a spinning wheel. Whatever slot the ball lands on is the number. The number is even or odd, black or red, or NONE (00 or 0). Predict what the number will be then place a bet. I suggest color bet. It's an easy way to win money. BUT ONLY IF YOU WIN. Just below are tips, and more information on this game.

Here's the entire roulette table typed with extreme accuracy.

My Tips and Hints

- Never ever bet on single number. A 2.63% chance of winning. But if you want to gamble like this, then choose 20.
- The red/black bet has a 47.37% chance of winning. Meh. More like 50/50.
- I like to make multiple bets. Like this:
Bet on red, a dozen bet, 1 to 18, column bet, even, AND six-number bet.

Horn High Wager

Similar to horn bet, but the split is between five numbers. The player can only wager an amount that is divisible by 5. One number is chosen from 2, 3, 11, or 12 to receive 2 units of the wager. If the next roll is one of the other three numbers, the wager is only 1 unit.

My Translation : You bet \$1,000 on 5:6: and get a 5:6:. You win 6,000.

You bet \$1,000 on 5:6: and get a 1:1:. You win 3,000.

Don't Come Bar (1-1)

Wager is made only after the pass line point has been established by the come-out roll. A don't come wager wins or loses by the rules of a don't pass line bet. If the next point after the don't come bet is 4, 5, 6, 8, 9 or 10, the chips are moved to the box of that number.

1.5 - Poker

=====

HOW TO PLAY

Seven-card Stud Poker

Objective

Each player will be dealt seven cards total. He or she must make the best five card hand from those seven to win the game.

Procedure

After anteing up, each player will receive two hole cards and one up card. The player who has the best up card will begin the wagering. After the wagering is complete, each player will receive an additional up card and wagers are again placed. The player showing the best hand will begin the wagering each round. This continues until all players have a total of four cards up. At that point, each player will receive one additional hole card and the final wagering will take place. After all wagering is done, each player's hand will be disclosed. Any folded hands will not be shown. Using five cards, the player who has the best hand wins.

Cards

One 52 card deck with no jokers is used. Aces are the highest card and Deuces (2) are the lowest. All suits are equal in strength.

Wagering

Seven-Card Stud has five wagering intervals. At each interval all players must either CALL, RAISE, FOLD, BET or CHECK. The wagering interval ends when all players' wagers become equal, with the exception of any players who may have folded.

Call

Match the wager of the player prior to you and remain in the game.

Raise

Raise the wager.

Fold

Drop out of the game. You will not play again until the hand is completed. If you FOLD, you'll lose all chips that you have wagered.

Bet

If you are the first better, or if the player prior to you CHECKED, you can bet the amount that you want within the table limit.

Check

Bet \$0. This is possible only when you started the wagering or if the player

prior to you CHECKED.

My Tips and Hints

- By betting the maximum limit, you can scare your opponents into folding.
- Got nothing? SCARE THE CRAP OUT OF YOUR OPPONENTS! BET ALL YOU HAVE AND KEEP RAISING!!
- In Laurel Palace (No maximum limit), if you bet more than what the people have, the people will tap out and you will see their cards and they cannot bet anymore. It's not very good to do this. But there is only one winner afterwards. If it isn't you, then you there will be only ONE opponent left. It's easier that way.
- Folding is very useful if you don't have the desired cards.
- I never fold. I say till the end and scare the crap out of my opponents because half the time I win!
- BEST GAME EVER! You can win a lot of money if you know when to hold them and when to fold them.

2.0 - Intro

=====

-A limo is being driven-

Cliff : When are we going to get there? I am so tired of riding in this car.

Isabelle : Oh quit complaining. We'll be there soon enough.

Maria : Well, it'll be nice to stretch my legs and walk around.

Cliff : I'm not complaining, just anxious to get there.

Maria : Black Jack, Slots, Roulette, Craps and Poker. Which game should I play first?

Isabelle : Well, I'm headng right to the poker table. That's where I'll make my riches.

Richard : I hope I don't lose my shirt, like I did the last time I went to Las Vegas.

Not Available : We're here! Good luck, and remember to go out in pairs, it'll be more fun.

3.0 - Story

=====

Insert your name. I prefer Mr. Ass. Afterwards, you will be in your hotel room and you will have to choose a partner. A partner is supposed to give you tips during any game if you ask for some. You can change partners when you're back in your room so don't worry if you chose someone bad. (Look in partner's advice section to see a partner's strengths and weaknesses.)

In a casino you can :

- Select game
 - Black Jack - Simple kick ass game
 - Slots - Simple game
 - Roulette - Easy game
 - Craps - Sort of complicated game
 - Poker - MY FAVORITE
- Exit casino
 - Select Casino
- Return to room
 - Save game and quit

- Switch Partner

Go play something until you get to the point where you have \$100,000 or over. The word "Congratulations" will appear blinking on your screen and then a woman will approach you and say...

Woman : Mr. Ass, I've got great news for you. Due to your great success, you have been awarded high-roller status, and with it a complimentary room at the Laurel Palace.

Partner : The Laurel Palace? We could never go there before. Good going Mr. Ass!

Woman : Go pack your bags, our limo is waiting to take you to the Laurel Palace.

Mr. Ass : Imagine that, me, a high-roller. I'll miss this old room, but not too much. Well, I hope my limo is ready. Now it's off to the Laurel Palace.

-Limo comes and takes Mr. Ass to Laurel Palace's hotel room-

Mr. Ass : Wow, check it out! A great room, and free to boot. Well, time to get back to the casino. And, there'll be no stopping me 'til I reach \$10,000,000!

Go gamble in this new casino with \$1,000 minimum and no maximum betting! Gamble till you win OVER \$9,999,999.

When you reach your goal, your partner comes up and says some stuff.

Partner : Congratulations! You now have over 10 million dollars! That's quite a sum that you have won! You are a very lucky person indeed, but I am sure it was not only your luck that let you succeed. So tell me now, what will you do with the money you have won? Please tell me your dreams...

Now type in your dreams. I typed in "I want to take a dump."

Partner : That is a wonderful dream that you have. Now, it is time to leave this desert land and make your dreams come true! You can do it, and you will! Not just because you have power and good luck to help you through. Let us not waste any more time. Let's go!

-Really short credits roll-

Then it says your dream...

"YOU WILL TAKE A DUMP."

THE END!!!!

If you liked this game you will also like these sorta luck-like SNES games.

Clock Tower 1 - Scary and Creepy

You'll be lucky that Bobby doesn't slice you open with his huge ass scissors.

Front Mission 1 - Robot Strategy

You'll be lucky that the missiles don't hit your wanzel and makes it goes on fire causing the pilot inside to melt from the inside out.

Out of this World - Scary

You'll be lucky that all the alien lasers coming towards you don't hit you and cause you to be vaporized into a million bits of smoking ashes. You'll also be lucky if this game doesn't give you nightmares about going into another world by being teleported and dying from...

1) Being eaten by some black beast.

- 2) Being eaten by a giant squid like beast.
- 3) Being bitten by a poisonous bug.
- 4) Being beaten in the head.
- 5) Being laserfied by the guards.
- 6) Falling in a pit.
- 7) Being crushed by rocks.
- 8) Running out of oxygen while swimming.
- 9) Being eaten by tongue monsters.
- 10) Being ambushed by dozens of armed alien guards.
- 11) Being hit by a powerful alien grenade
- 12) Not escaping fast enough from the alien tank.
- 13) Being pushed off a ledge while being wounded.
- 14) Doing the wrong thing that effects the future outcome of your gameplay.
- 15) Not saving your alien friend which is leads to death number 14...

5.0 - Partner's Advice
=====

Some partners are good in giving advice in CERTAIN games.

SLOTS ARE NOT INCLUDED.

Richard

BlackJack - He sucks! He tells you to stand at low numbers like "14".
Craps - Seems to be good... Don't really know.
Poker - THE WORST! I had a 4H, 6C, 7C, QS, and 8C. He told me to fold!

But I went on and got a flush and won \$1,501,000!

Roulette - Doesn't say much. Very, very bad.

Cliff

BlackJack - Pretty good.

Craps - Seems to be good... Don't really know.

Poker - Keeps telling me to fold.

Roulette - Very, very bad.

Maria

BlackJack - She keeps telling me to HIT even though I have a 20!

Craps - Pretty good.

Poker - She keeps telling me to call. I think she knows what she is doing.

Roulette - Very, very bad.

Isabelle

BlackJack - MASTER!

Craps - Seems to be good... Don't really know.

Poker - OK

Roulette - Very, very bad.
